This half term in Warrior Class!

Our Big Questions

How important are scientific forces in our every day lives?

What impact can growing plants have on a community?

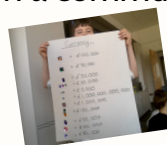

Communication

We have planned science experiments like floating boats, read and sorted facts about the planets and made vlogs about our interests.

Core

We have calculated the cost of tickets to different attractions, compared number facts about space, and solved problems together.

Personal Development

We have been thinking about different ways to stay regulated, explored the new sensory equipment and worked together to build a rocket!

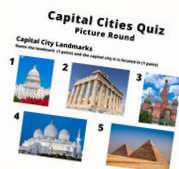

Science

We have designed boats with the best buoyancy, made helicopters fly, planted cress seeds, and explored the structure of plants.

Humanities

We have enjoyed quizzes about capital cities, talked about historic events and catastrophies, and compared historical figures using top trumps.

Arts

and

DT

We have painted the solar system, created plant sculptures from clay, and worked together to build spaghetti marshmallow sculptures.

Food

and

Life Skills

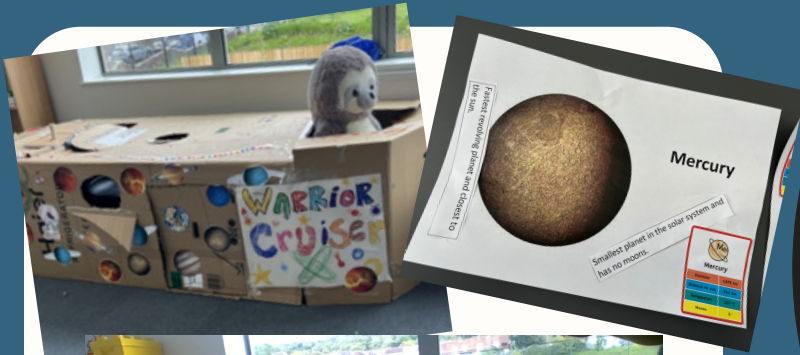

We have made cupcakes, macaroons, chocolate brownies and taste tested lots of foods.

Outdoor Learning

We have planted seeds, explored our playground equipment, and played ball games on the MUGA.

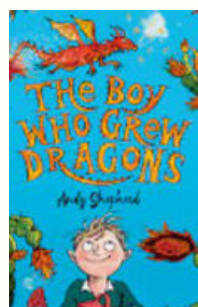

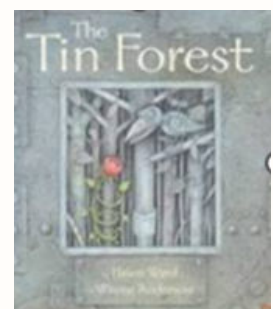

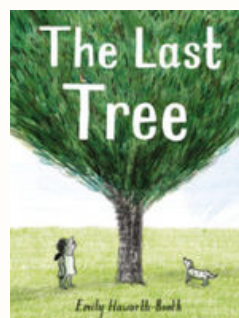

I am really liking getting new friendships in my class.

Oscar S

Family Support Resources

If your child would like to continue this project at home, they could keep an eye on the progress of their cress head. They could also share their knowledge of plants with people at home by creating something from recycled items. There are lots of books linked to plants which might be of interest too.

Meet the Team

We have really enjoyed getting to know Team Warrior this half term and are so proud of each and every one of them. We have learned lots about their interests, likes, dislikes...and how much they love biscuits!

Emma

Georgia

My favourite part of coming to Wymering is playing football out on the MUGA with everyone from all different classes.

Harlee
