This half term in Nelson

Our Big Question

Happy New Year to Team Nelson! This half term our topic is 'Big Thinkers?' which is a Science and History based topic that will look at how big thinkers in art and science have shaped our world. The topic will end with our very own science fair on Thursday 13th February in the afternoon, where we will welcome family to come and see the inventions designed by our pupils and their work from throughout the term. In History we will be comparing past and present times and explaining how significant people have shaped our world. In Art we will be creating our own masterpieces in the style of famous and influential artists and explaining what we know about them. Science will see pupils beginning to develop an understanding of how things work and how inventions have made everyday life easier. English lessons will be linked to the topic, with a focus on writing informative texts. In Maths this half term we will be focusing on fractions, using practical examples, building to equivalent fractions and understand how fractions are part of a whole. As well as our 'Big Thinkers' curriculum focus, our studies in PE, BTEC Home Cooking, Mental Health and Wellbeing and Life Skills will continue.
